

ABOUT ME

Computer science student with a focus on data and automation. I work across Java, Python, C and C++, and build practical tools using pandas, NumPy, BeautifulSoup4 and SQL. Currently open to freelance projects involving scraping, reporting, and small automation scripts

Islamabad Pakistan

SKILLS

- Java, Python, C, C++
- SQL — schema design & queries
- pandas & NumPy
- Matplotlib
- BeautifulSoup4 (web scraping)
- Pillow (image processing)
- Object-oriented design
- Git & GitHub

LANGUAGE

- English
- German(beginner)

[Muhammad Ashar Waleed]

Software & Data Developer

Education

2025 –29

Comsats University Islamabad

BS Data Science

2022 – 2024

Superior College Malakwal

Fsc pre-engineering

Projects

CSV to PDF Import Tool

pandas, reportlab

- Imports raw CSV data and converts it into clean, formatted PDF reports.

Customer-Churn Dashboard

pandas, matplotlib, SQL

- Analyzes customer data to visualize churn trends and flag at-risk accounts.

Inventory Management System

Python, SQL, pandas

- Tracks stock levels, orders and suppliers with real-time reporting.

Finance Tracker

Python, pandas, matplotlib

- Logs income and expenses and visualizes monthly spending patterns.

Business Analytics Dashboard

pandas, matplotlib, SQL

- Consolidates business data into interactive charts for key metrics.

Resume-Screening System

pandas, pdfplumber, python-docx, reportlab

- Scores resumes against job requirements and generates a ranked shortlist report.

Email Automation System

pandas, matplotlib

- Bulk email tool with personalization, dry-run testing and campaign reporting.

Website Change Monitor

requests, BeautifulSoup4, pandas, matplotlib

- Tracks web pages for changes with full history and automated diff reports.

PDF Invoice Generator

pandas, reportlab, Pillow

- Converts CSV orders into professional PDF invoices with tax calculations.
